Merrill's Roxy Cinema	Version <1.0>
	Date : 12/9/16

Introduction

Purpose

The purpose of this document is to describe the requirement specification for the web site “Merrill's Roxy Cinema”.

The intended audience for this document is the current owners of the movie theater, or another small theater that wants a site to manage & update current movie showtimes

Definitions, acronyms, and abbreviations

Sample for the client:

ER Diagram – a diagram to represent the data you want to save with your system

W3 Validation – refers to both Html and CSS validation tool provided by the W3c.org. the html validator is located at:

<http://validator.w3.org/>

with the CSS validator located at:

<http://jigsaw.w3.org/css-validator/>

Overall Description

Merrill's Roxy Cinema is a real theater, but I replicated their site for the purpose of creating a database management system for movies and showtimes. My main focus was the database and used the existing site as a template for content.

The public site is pretty basic. The most important thing being showtimes for current movies.

I automatically display showtimes based on when they expire using the admin back end and old ones are removed

Merrill's Roxy Cinema	Version <1.0>
	Date : 12/9/16

Story Board

	Header with site title & several images	
	Home Synopses Reviews Coming Soon Prices Newsletter About	
	<div> <div>Movie Title</div> <div>showtimes</div> <div>Picture</div> </div>	<div> <div>Movie Title</div> <div>showtimes</div> <div>Picture</div> </div>
	<div> <div>Movie Title</div> <div>showtimes</div> <div>Picture</div> </div>	<div> <div>Movie Title</div> <div>showtimes</div> <div>Picture</div> </div>
	Footer	

This will be a centered layout with most pages having a similar look
Some pages follow the 2-column layout
and others will just be full width (Coming soon, about & Reviews)

Specific requirements

1. The front-end that the user sees will be a centered layout with 2 columns on some page & others full width
2. Homepage is for showtimes with each movie being a little article box with rounded corners
3. Coming soon & Synopses are very similar layouts, but just different data being displayed from the database
4. Background photo is orange & yellow. Text & background match it
5. A simple header with images from the company will display location & phone & map
6. A mailing list/newsletter page that emails the user & saves their info
 - a. A message is shown if they are already in the database
- 7.
8. Most of the coding is on the back-end for admins of the site to add movies
9. A fully-functional admin pages allows you to:
 - a. Add a new movie
 - i. Movies can be added as 'hidden' for the future or 'coming soon' or 'current'
 - ii. deleting a movie removed all associated data
 - iii. Pictures are stored on the server and you can only choose 1 poster per movie (one that's not already used by another movie).
 - b. Edit the info once a movie is added
 - i. synopses are optional & only displayed if they exist
 - c. add showtimes to that movie
 - i. each has an post date & expiration & are only shown on the site in that time frame
 - ii. a move is only shown if it has visibility "Current" & actually has any showtimes
 - iii. delete showtimes
 - d. Add reviews & edit them
 - i. Completely optional & a move doesn't appear on the reviews page if it doesn't have any reviews or is no longer showing
10. A message is displayed notifying the admin what they just changed, added or deleted
11. All data associated with a movie can be updated, changed, or removed completely
12. All data is validated to make sure it's in the correct format for the database to accept
